PROFESSIONAL SUMMARY

Bilingual Environmental Engineer with hands-on experience in spatial analysis, environmental modeling, and geospatial data management. Proven ability to process satellite imagery (Copernicus, ALOS PALSAR, GEDI) and build automated geospatial workflows. Highly proficient in integrating Python data-science methods with Google Earth Engine to optimize environmental data analysis, ensuring data quality and accuracy for sustainability and nature-based carbon projects.

PROFESSIONAL EXPERIENCE

Sustainability Analyst / GIS Specialist
Nov 2024 – Present

EGREEN Chile SpA
Bogotá, Colombia (Remote)

- Process and model geospatial data using GIS and remote-sensing tools for the analysis of environmental and nature-based projects.
- Analyze complex satellite imagery datasets (Copernicus, ALOS PALSAR, GEDI) for biomass estimation, land-cover classification, and detection of anthropogenic activities.
- Design and implement automated geospatial workflows by integrating Python (GeoPandas, Rasterio, GDAL), Google Earth Engine (GEE), and the ArcGIS suite, improving data-management efficiency.

EDUCATION

Specialization in Geographic Information Systems (GIS)
Currently Enrolled

Universidad Distrital Francisco José de Caldas

Relevant coursework: Database Design · GIS I · Object-Oriented Programming · Remote Sensing · Markup Languages · Geostatistics · GIS Lab.

M.A. in Environmental Project Management & CSR
Expected 2026

EUDE Business School

B.S. in Environmental Engineering
2024

Universidad Distrital Francisco José de Caldas

TECHNICAL SKILLS

GIS & Remote Sensing

Google Earth Engine (GEE) | ArcGIS Pro | ArcMap | QGIS | Satellite Imagery

Programming & Data

Python | Rasterio | GeoPandas | GDAL | Object-Oriented Programming | Machine Learning | SQL | R

CERTIFICATIONS

- Machine Learning & Data Science Complete Course with Python — Udemy (Dec 2025)
- Exploring from the Sky with Remote Sensing & Drones — Esri Colombia (Nov 2025)
- Calculating Spectral Indices for Land & Aquatic Applications Using QGIS — NASA (Feb 2025)
- Preparing Data for Analysis with Microsoft Excel — Microsoft (Dec 2024)
- Environmental Licensing Virtual Course — ANLA (Nov 2024)
- Explorer Level Programming – Python — MinTIC (Aug 2024)
- Environmental Management Diploma – ISO 14001 — Politécnico de Colombia (Mar 2024)
- GIS Application in Forestry & Agroecological Systems — SENA (Mar 2024)
- Data Science — Universidad Distrital Francisco José de Caldas (Nov 2023)
